

Alliance Solutions Group is currently seeking a **Certified Industrial Hygienist** to provide Advisory and Assistance Services to U. S. Air Force. Our growing company develops a wide array of innovative solutions to the challenges faced by our clients. We are seeking smart, adaptive people to work collaboratively with a multidisciplinary and geographically dispersed team.

Successful applicants will conduct studies and assessments based upon Air Force occupational and environmental health (OEH) policies, guidance, procedures, and programs to include the following:

- Design or improve OEH guidance for the Air Force
- Perform Environmental Health Radiation Contamination Surveys
- Build or improve guidance for selecting and utilizing Occupational and Environmental Exposure Limits (OELs) and other OEH-related guidance levels
- Suggest detailed guidance for selecting and maintaining OEH health hazard control options, including engineering controls, administrative controls, collective protective techniques, or individual/personal protective equipment
- Provide detailed evaluation installation level OEH programs. Examples include Environment, Safety, and Occupational Health Compliance and Management Program (ESOHCOMP) audits and OEH program management reviews.
- Recommend or improve health hazard recognition, analysis, or control training products, which could include plans of instruction, slide sets, or exercises.

Major Duties Include:

- Assist with the preparation of scientific and technical information (STINFO) documentation.
- Provide management support for activities and interact with multiple technical teams to ensure projects are successfully completed on schedule.
- Provide subject matter expertise to various project and program initiatives
- The contractor shall support customer projects by assisting with investigations, analysis, plans, designs, implementation, and identification
- Provide expert level support for issue resolutions and recommendations to achieve desired outcomes
- Support the government project lead and effectively ensure products are delivered on time and with high quality and ensure the programs are performed on schedule and on cost.
- Interface with customers to ensure customer needs are being addressed in a timely manner.
- Provide oversight and consultation to the customer.
- Support customer projects by assisting with investigations, analysis, plans, designs, implementation, and identification. Provide expert level support for issue resolutions and customer support.
- Provide management support for activities of and interact with multiple technical teams simultaneously to ensure projects were successfully completed on schedule and within budget.
- Assist the government lead with programmatic oversight for multiple programs.
- Support plan implementations by preparing and reviewing program documents such as detailed OEH Programs.

Position Requirements:

- Master's Degree in industrial hygiene and 5 years in the respective discipline
 - Certification as a Certified Industrial Hygienist or CIH.
 - Computer skills: Familiar with Microsoft office suite, formatting for all work products/outcomes.
 - Experience collecting, analyzing, interpreting and evaluating data to assess trends and developments.
 - Effective communication and public speaking skills in English
- Preferred Qualifications:**
- Desired specialized expertise includes: program management, strategic planning, process design and human effects characterization.

Benefits: A full benefits package to include, PTO, Medical, Disability, Retirement Plan and more.

Travel: Not required for this position

Position of Trust: Eligibility for a position of trust is required for this position. Applicants are required to complete a government background investigation and be cleared for a position of trust.

This position is contingent upon contract award, budget, and/or customer approval with an expected start work date of May 1st, 2017.
