*Preparing for a safe and secure tomorrow*

## ASG's HICS Training in the GCC

- 1,800 Medical Staff Trained
- 34 Hospitals Prepared

## ASG's HICS Training Worldwide

- 200 Hospitals Worldwide
- 18,000 Staff Worldwide

## ASG's HICS Courses

### HICS Awareness Course

An introduction to HICS for all levels of medical and facilities staff regardless of their roles or responsibilities during a disaster. Focuses on learning the framework of HICS and how it is used to manage disaster response within a medical facility. General medical staff will learn potential ways they may be used during disaster response efforts. (Prerequisite for all courses)

**Length:** 2 Hours

**Participants:** 50 - 100 (Pending room size)

**Audience:** All staff

### HICS Operations Course

Provides an in-depth look into operational aspects of HICS during disaster response. Emergency responders must be fully aware of the various roles within the HICS, how HICS enables the management of incidents that expand complexity, and how HICS practically works within the scope of the hospital's Emergency Operations Plan.

**Length:** 3 Hours

**Participants:** 15 - 25

**Audience:** Emergency Managers & Crisis Leaders

### HICS Practical Course

Equips HICS leaders with the knowledge, confidence and practice implementing HICS and using the various recourses available. This course will introduce and operationalize the Hospital Command Center and how it is utilized to coordinate and assign recourses during a crisis.

**Length:** 3 Hours

**Participants:** 15 - 25

**Audience:** Emergency Managers & Crisis Leaders

### HVAs for Hospitals

Emergency Managers need the necessary tools to plan for all hazards based on risk. Hazard Vulnerability Assessments (HVA) enable Emergency Managers to identify the hazards/risks that could lead to complex mass casualties and disruptions to hospital operations. This course will empower Emergency Managers to conduct an HVA and apply the results into the hospital's EOP.

**Length:** 7 Hours

**Participants:** 15 - 25

**Audience:** Emergency Planners/Managers

### Crisis Leadership & Decision Making

Leadership during a crisis can be challenging and stressful. To navigate the crisis successfully, crisis leaders must understand the operational environment, decision making models, methods for overcoming stress and how to process large volumes of data. This course gives leaders skills and tools including situational awareness, decision models and countering the effects of stress.

**Length:** 7 Hours

**Participants:** 8 - 12

**Audience:** Emergency Planners/Managers

### HICS Branch/Unit Leaders Practical

This course builds on the Awareness course and focuses on operationalizing Branch and Unit Leaders assigned to roles under the Hospital Incident Management Team (HIMT). Course focuses on practice with HICS tools and forms. Objective is to develop competent Branch and Unit leaders to support incident response under each section. Customized for each Branch/Unit.

**Length:** 7 Hours

**Participants:** 25 - 40

**Audience:** Emergency Planners/Managers

## 1-5 Day Training Program Options · HICS Coaching/Implementation · Plan Writing & Reviews
