INTEGRATING CLIMATE CHANGE CONDITIONS INTO PREPAREDNESS ACTIVITIES

FEMA COURSE MGT-### TBD

*EQUIPPING LEADERS TO BUILD
PREPAREDNESS STRATEGIES
FOR CLIMATE RISKS*

With extreme weather events increasing in frequency and intensity, integrating the whole community in preparedness activities is essential for achieving more equitable outcomes. This course will provide emergency planners, managers, and responders with the best practices for including the whole community of stakeholders throughout the preparedness cycle in order to better serve underserved and disadvantaged communities.

INTEGRATING CLIMATE CHANGE CONDITIONS INTO PREPAREDNESS ACTIVITIES

COMING IN 2024

Course Overview:

This course prepares emergency planners, managers, and first responders to develop strategies for reducing the societal impact of future climate scenarios and extreme weather events through the National Preparedness System. Participants will enhance capabilities to address climate risks and address vulnerabilities by adopting best practices for incorporating vulnerable populations into risk assessments, planning, equipping, training, and exercises. By the end of the course, participants will have the ability to enhance whole community preparedness and capabilities with the latest best practices and resources.

Course Scope:

This course equips participants to integrate the whole community throughout climate preparedness activities to strengthen capabilities, address vulnerabilities, and achieve more equitable outcomes.

Course Core Capabilities:

- Operational coordination
- Planning
- Economic recovery
- Long-term vulnerability reduction
- Risk and disaster resilience assessment
- Community resilience

Target Audience:

Emergency managers, planners, and first responders

Certification:

A certificate will be issued to participants who successfully complete this course.

Course Length:

4 hours, virtual, instructor-led training
