

HICS TRAINING PROGRAM

 **5-Levels of Training for World-Class Healthcare Preparedness**

LEARN MORE

Level 1: HICS Awareness Course

Course Description

This course introduces HICS for all levels of hospital staff regardless of role or responsibilities within the disaster response efforts. This course focuses on learning the framework of HICS and how it is applied during an incident. General medical staff will learn the key elements of implementing HICS.

Audience

All Medical and General Staff

Course Length
1-hour

Level 2: HICS Practical Application Course

Course Description

This course provides an in-depth look into operational aspects of HICS during incident response. Medical staff must be fully aware of the various roles within the HICS, how HICS enables the management of incidents that expand in complexity, and how HICS practically works within the scope of each healthcare business unit's Emergency Operations Plan.

Audience

Disaster Links, Emergency Planners, Command & General Staff, Crisis Leaders

Course Length
5-hours

Level 3: HICS - Designing & Implementing Effective Exercises

Course Description

Effective exercise design, development & implementation is critical to building disaster preparedness capacity for medical emergency responders. This course highlights the role of exercises in the preparedness system. This course equips participants with the knowledge, skills, resources, and best practices for designing, implementing & evaluating exercises to ensure continuous improvement.

Audience

Disaster Links, Emergency Planners & Responders, Leaders

Course Length
2-hours

Level 4: Hazard Vulnerability Assessments (HVAs) for Hospitals

Course Description

HVAs help hospitals identify the hazards and risks that may lead to mass casualty incidents and disruptions to operations. This course will enable Disaster Links and Emergency Planners to conduct an HVA and apply the results in the hospital's Emergency Operations Plan and preparedness program.

Audience

Disaster Links, Emergency Planners, Leaders

Course Length
3-hours

Level 5: Crisis Leadership & Decision Making for Healthcare Leaders

Course Description

This course is designed to equip crisis leaders with the skills and tools needed to recover quickly and preserve life, safety, health, and property. Topics include scene size-up, decision support tools and models, situational awareness, and best practices for countering the effects of stress on the leader.

Audience

Healthcare Executives and Crisis Leaders

Course Length
6-hours

WHY CHOOSE ASG?

ASG has a proven track record of delivering value added services and boasts a 98% customer return rate. We implement the proven Capacity Building Model into all projects :

DO NOT WAIT UNTIL IT'S TOO LATE

GIVE YOUR MEDICAL SYSTEM THE CAPABILITIES NEEDED
TO MANAGE DISASTERS & INCIDENTS OF ANY SCALE

EASY TO START WITH 4 STEPS

STEP 1: REVIEW

Review courses while considering disaster and emergency risks to your medical system & current capability gaps.

STEP 2: CHOOSE

Choose:
Courses
Dates
Location
Participants

STEP 3: DESIGN

ASG develops the training schedule, pricing, and submits a quote.

STEP 4: DELIVERY

Make a deposit to schedule the training. Then, ASG will coordinate two pre-training meetings to ensure a seamless, stress-free training event.

ABOUT ASG

ASG provides innovative solutions for the world's most challenging problems in the CBRNE preparedness, emergency management, and Health & Safety sectors. ASG is leading the way with developing new capacity building programs for enhancing nuclear threat preparedness and response capabilities that tackle new trends in global CBRNE risks.

Courses meet/exceed international standards:

- HICS Guiding Documents
- NFPA 1660
- ANSI/EMAP 5-2022 Emergency Management Standard
- Global Best Practices & Lessons Learned
