

Ensuring Effective Public Information and Warning for Tribal Nations

FEMA COURSE MGT-327

EQUIPPING LEADERS TO BUILD RESILIENT COMMUNITIES THROUGH COLLABORATION

Course Overview:

In this course, participants will learn how to use available resources and techniques to distinguish people with access and functional needs within their communities, analyze their specific needs, develop trust relationships, and create effective communication strategies. Participants will learn practical techniques for developing messages and delivering them to increase their effectiveness when collaborating with trusted organizations within the community. Finally, participants will ensure the messages are tailored to address specific needs among the community members. By completing this course, participants will gain hands-on experience through performance-based activities and the knowledge and skills necessary to effectively communicate weather risks among the community.

Course Scope:

This course teaches Tribal Nations, Emergency Managers, Community Resilience Planners and alerting personnel, effective communication of weather risks tailored to address community needs and people with access and functional needs within their communities, and collaborate with trusted organizations.

Certification:

A certificate will be issued to participants who successfully complete this course.
